

# The Way It Was Meant To Be!

## 65" Digital 16:9 HDTV Projection Television

The premiere offering from Hitachi, the Director's Series makes a definitive statement in any room, from the elegant black high-gloss finish to the artfully sculpted profile. Hitachi's new Hybrid Wide-Neck CRTs, Super Contrast Lenses, proprietary VirtualHD digital video processor and Deep Black Anti-Reflective screen work in concert to deliver an unparalleled Home Theater experience. The integrated HDTV tuner enables reception of terrestrial and unscrambled cable HDTV signals, eliminating an outboard HDTV tuner. There are digital interfaces for both DVI and IEEE 1394 for use with the latest generation of HDTV set-top boxes.

Incredible! The Sunfire Ultimate Receiver is the most powerful home theater receiver in the world. Packed with Dolby Digital EX, DTS ES, Pro Logic II, DTS Neo:6, and more, as well as a world-renowned Sunfire power amplifier rated at an astonishing 200 watts on each of its SEVEN channels. If a receiver is what you're after, you've found heaven.

The DVD-1600 is designed to bring out the best performance of both pure audio and A/V sources. The Audio Only mode allows the audio signal from DVD-Audio sources to maintain its purity as it bypasses the video circuitry and is D/A converted at the very high resolution of 24 bits and 192 kHz sampling. As a video player, the DVD-1600 converts video signals at the very high resolution of 10-bits and 54 MHz. The DVD-1600 also gives you a Headphone Virtual Surround feature that lets you enjoy the effects of Dolby Digital multi-channel sound through your headphones.

The Model 6000U High definition television (HDTV) receiver lets you enjoy television entertainment in a whole new way. Sharper images and clearer sound bring television programming to life right in your living room with picture quality that is 6 times greater than standard television. This receiver allows viewing of standard or high definition television programming, and offers 5 different methods for displaying non-HD 4:3 images on 16:9 HDTV screens.

## *Bell'o*

ATC-2052MC

A stunning combination of wood, metal and Italian tempered safety glass, this stand-alone audio tower is also designed to be a companion to the AVSC-2051 audio video system. It accommodates up to (10) ten or more audio video components.

# Unreal Sound Clarity & Quality

**All Definitive Bipolar Power Towers are specifically engineered for the finest audiophile music systems as well as for use as the main left and right front speakers (as well as rear and side speakers) in home theater systems of the highest quality. Experts agree that Definitive's bipolar power towers deliver absolute state-of-the-art performance, and our complete award-winning bipolar home theater systems that are based on them are clearly the best available.**

The new BP2002TL is a more powerful refinement of the two-time Grand Prix Award-winning BP2002. The original BP2002 has been hailed as one of the greatest loudspeakers ever. Home Theater called its performance "staggering" and England's Gramophone, the world's top classical music magazine, honored it with their Editor's Choice Speaker-of-the-Year Award and their reviewer Alvin Gold wrote, "Their imaging is a dream. Musically, this is one of the most appealing and informative loudspeakers around." And now, with double the amp power, a new sub-woofer driver (with longer throw, a larger voice coil and an even bigger magnet structure) plus dual D'Appolito arrays, the new BP2002TL, with all the features of its big brothers, is even better.

Definitive has always led the industry with the best-sounding shielded center channels available. Optimum surround sound home theater reproduction places heavy demands on the center channel speaker, which in many respects is the main speaker in the system and often handles 50% or more of the program material. It is no place to compromise and settle for second best. Because of this, Definitive pioneered the concept of full frequency range high-definition center-channel speakers.

Definitive's bipolar surrounds are designed for easy and unobtrusive placement in your room. Easy-to-use mounting plates are included for wall mounting if desired. Positioning is extremely non-critical; unlike dipolar surrounds, which are limited by their specific sidewall placement requirements, Definitive's bipolars may be located on the sides or rear of the room (or both as in Dolby EX installations) or on the ceiling. They may be mounted on the rear wall (with their front drivers shooting towards each other and their rear drivers shooting toward the side walls) with excellent results.
