The Way It Was Meant To Be

Hitachi

43" Digital 4:3 HDTV Monitor/Projection Television

An intelligent balance of technology and value, the FDX models incorporate high-performance CRTs and lenses along with a high-contrast fine-pitch screen. Hitachi's VirtualHD™ digital video processing upconverts conventional NTSC sources to HD specifications and smoothly corrects for motion artifacts that may have been introduced into the original film or video sources. This 43-inch model is a tabletop set that has an optional matching base. The 4:3 models also include 16:9 modes for displaying HDTV.

For optimum Dolby Digital and DTS reproduction, the AVR-483 features high quality, wideband audio amplification, providing 100 watts power output for each of the five main channels. A large capacity power supply includes a high current power transformer along with discrete power output devices on all five amplifier channels for highest dynamic range and superb reproduction clarity.

Onkyo's new DV-SP300 offers all the features you would expect in a high-end progressive scan DVD Player without breaking the bank. That's right, this DVD/CD player lets you enjoy the sharpest picture quality that DVD has to offer. Progressive scanning gives you double the scan lines of a conventional interlaced picture when used with compatible TVs. Connection to your TV or digital receiver is a breeze with a vast array of analog and digital outputs—coaxial, optical, S-Video, component, they're all here.

Definitive Technology Pro-Cinema 80

Definitive engineers set out to create truly compact, beautifully styled, ultra-high performance, high-value, state-of-the-art, matched systems combining small high quality main and surround speakers, timbre-matched center channel speakers and super dynamic powered subwoofers. It was essential that each component part should excel separately, while together they would combine into three-, four-, and six-piece music and home theater systems of a quality level never before achieved by speakers this compact. Definitive's engineering/design group has triumphed!

Bell`o

AVSC-6056M
